COMMERCIAL AUTO GLASS

WINDSCREENS

We know that 70% of the modern car's strength is its automotive glass - that's why our SABS approved glass fitment centres carry out their profession to the highest standards, using the recommended sealers and drying times.

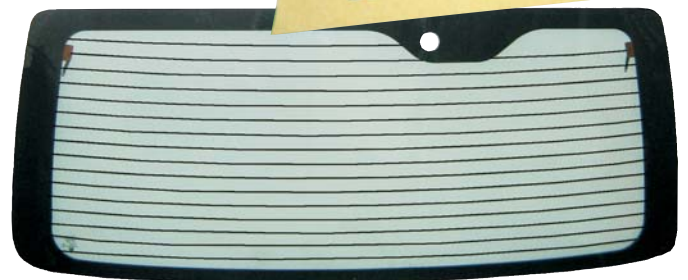

We have a national dealer network fitting Shatter Proof windscreens and tough level side glass to SABS standards. It incorporates the latest S-Lec film which reduces UV rays and assists in cooler interior temperatures.

This is the company I was telling you about!

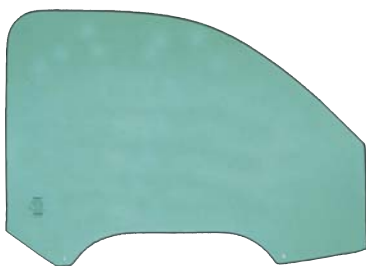

Windscreens available for over 1300 popular models - in stock.
Our Windscreens are Shatter Proof.
